

Ken McCrady – September 2014

After leaving Loveland High school, I continued my education and graduated from UNC. From there I went to Sunny Vail California working for Control Data installing super computers at various military installations in the US. I then moved back to Colorado where I worked for HP for over 20 years. While at HP, I got married to a wonderful lady, Jena. We now have two great boys, Steve 28 & Scott 23. Steve is a pipe-line engineer and Scott is a construction consultant. We are very happy since both are living in Denver. After HP, I owned and managed a franchise in Texas, and then sold commercial real estate in Loveland. I've since retired and am spending my time on the golf course and skiing.

I consider myself very lucky to have three of my best high school friends still in Colorado, Ron Smith, Chuck Ulfers, and Gary Disney!

I have had a great Life !!!!!!!
